Technical Note – How to check the version of Atlas base software (Baseware)

a) To check the update has worked, select ‘M’ on the idle screen and press the atlas dial

b) Select ‘Administration’.

c) Select ‘Detected Hardware’.

d) Select the ‘Atlas Base’

h) And finally, scroll down and check the atlas base version (Item 5 in the list)
Make a note of this version and let Support@Syrris.com know when requested.
